

# Assumptions, Risks and Open Questions

Items the client must confirm before build

|                  |                                                  |
|------------------|--------------------------------------------------|
| Project          | Property Insurance Placement ERP (working title) |
| Client           | Fiducial (Anila Mary S)                          |
| Vendor           | Spirezen Enterprises (Hiral Patel)               |
| Document version | v0.2 (Draft)                                     |
| Date             | 05 October 2026                                  |
| Status           | Draft for client review                          |

*Version 0.2 is based on the IIB Code Master workbook, the Sookshma and Laghu add-on charts, and the four client workbooks received on 5 Oct 2026 (Data Sheet, RFQ, QCR, Placement Slip). Items still waiting on client answers are marked **[TBC]**. See document 07 for the analysis of the client formats.*

## 1. How to use this log

Each question has an ID, why it matters, and the milestone by which an answer is needed. Priority: A = blocks design or build, B = needed before UAT, C = nice to know.

## 2. Open questions for the client

| ID  | Question                                                                                                                                                                                    | Why it matters                                                           | Pri | Needed by |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|-----|-----------|
| Q01 | Received 5 Oct 2026. Please confirm the four formats are final and share one filled example of each (the Risk details sheet says 'collected during Oct 22').                                | Defines fields, outputs and layouts                                      | B   | M0        |
| Q02 | What is the exact add-on premium formula? Example: for cover 1 is premium = 1% x policy rate x (5% x SI)? Please give 2-3 worked examples.                                                  | Add-on 1 comes out at about Rs 58 on Rs 10 Cr SI; this must be confirmed | A   | M0        |
| Q03 | Define 'policy rate': Fire only, Fire + STFI, or Fire + STFI + EQ (+ Terrorism)?                                                                                                            | Drives every add-on premium                                              | A   | M0        |
| Q04 | Schedules say BSUS up to 5 Cr, BLUS above 5 Cr to 50 Cr, SFSP above 50 Cr, PAR above 5 Cr. Is the test on total or per-location SI, and when is PAR chosen over BLUS? Can locations differ? | Product selection, caps and excess                                       | A   | M0        |
| Q05 | Where does the Terrorism rate come from? The master has risk types but no rates.                                                                                                            | Terrorism premium                                                        | A   | M0        |
| Q06 | What do Preferred / Referred / Declined mean, and which occupancies fall in each? Only the legend appears in column V.                                                                      | Acceptance rules and approval workflow                                   | A   | M0        |
| Q07 | Is the IIB rate a benchmark that insurers may discount or load, or a fixed rate? Should the system record insurer-quoted rates against it?                                                  | QCR comparison and variance                                              | B   | M2        |
| Q08 | The master is labelled 2019 rates. Is this the current IIB rate set? How often is it updated and who supplies updates?                                                                      | Versioning and maintenance                                               | B   | M1        |
| Q09 | Which GST rate or other taxes apply, and should the premium show GST separately?                                                                                                            | Premium breakdown                                                        | B   | M2        |
| Q10 | Code 2075 has a blank Terrorism risk type; pincode 100000 maps to Gujarat; 400001 shows state 'Mumbai'; row 'Multiplex / Malls' is highlighted. Please confirm corrections.                 | Master data accuracy                                                     | B   | M1        |
| Q11 | Are there other occupancy-specific rules (loadings, deductibles, minimum premium) not in the master?                                                                                        | Rating completeness                                                      | B   | M2        |
| Q12 | How many users, in what roles, and who approves RFQs and placements?                                                                                                                        | Roles and workflow                                                       | B   | M1        |
| Q13 | Which insurers do you work with, and do they share quote formats we should model?                                                                                                           | Quote form design                                                        | B   | M3        |
| Q14 | Should RFQs be sent from the system by email (which mail domain / SMTP) or generated and sent manually in R1?                                                                               | Email integration                                                        | B   | M3        |
| Q15 | Do you need the client and insurer portals, or is internal use enough for the first release?                                                                                                | Scope and plan                                                           | B   | M0        |
| Q16 | Are renewals, endorsements and accounting expected in this project or a later one?                                                                                                          | Scope boundary                                                           | B   | M0        |
| Q17 | Do you want to import existing Data Sheets and past placements? How many and in what format?                                                                                                | Migration effort                                                         | C   | M2        |
| Q18 | Record retention requirements and any IRDAI or broker-regulation reporting needed?                                                                                                          | Compliance design                                                        | B   | M1        |
| Q19 | Hosting preference: your cloud account, ours, or on-premise? Any data residency rules?                                                                                                      | Infrastructure and cost                                                  | B   | M1        |
| Q20 | Branding: logos, colours, document headers and footers to use?                                                                                                                              | Templates and UI                                                         | C   | M2        |
| Q21 | Are there multiple companies or branches that need separate numbering and data views?                                                                                                       | Multi-tenancy and slip numbering                                         | C   | M1        |

| ID  | Question                                                                                                                                                                                                                                      | Why it matters               | Pri | Needed by |
|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|-----|-----------|
| Q22 | Is a single RFQ per risk enough, or do you need multiple RFQ rounds and versions?                                                                                                                                                             | RFQ model                    | C   | M3        |
| Q23 | Which rates or rules should price the 13 non-fire sections (Burglary, FLOP, Money and so on)? Or are they always quote-driven?                                                                                                                | Scope of the rating engine   | A   | M0        |
| Q24 | Is the RFQ/QCR renewal-only, and is the Data Sheet used for new business? How should a new proposal appear in the QCR (no existing policy)?                                                                                                   | Workflow design              | A   | M0        |
| Q25 | The Placement Slip premium sheet lists only 4 sections (Fire, Burglary, Fire Floater, Burglary Floater) and two insurer columns. Should it cover all 14 and what does Capacity mean (co-insurance share)?                                     | Placement slip design        | A   | M0        |
| Q26 | RFQ options are labelled Option 1 / Proposed Option 1 / Proposed Option 3, while the QCR says Option 3 / Proposed Option 2. Please confirm the three options are Existing, Proposed 1, Proposed 2.                                            | Labels and logic             | B   | M0        |
| Q27 | GST is fixed at 18% in all sheets. Should it stay configurable? Burglary first-loss options include 75% only on the Placement Slip; confirm.                                                                                                  | Rating and templates         | B   | M2        |
| Q28 | Four BSUS/BLUS add-ons say 'some % on total sum insured' (Electrical Apparatus, Process damage, Accidental damage, Municipal regulations). What are the limits? Please also confirm which wording of expediting and contamination is correct. | Add-on master                | A   | M0        |
| Q29 | Who maintains the add-on lists (163 fire, 125 PAR, 185 SFSP) and clause wording, and how often do they change?                                                                                                                                | Admin screens and versioning | B   | M1        |
| Q30 | The Data Sheet has no occupancy code or separate pincode field, but rating needs both. Add them, and who selects the occupancy code?                                                                                                          | Rating inputs                | A   | M0        |
| Q31 | Typos in client sheets (for example 'Standara Fire'): should generated outputs keep or correct them?                                                                                                                                          | Template fidelity            | C   | M2        |

### 3. Assumptions

| ID | Assumption                                                                                               | If wrong                                              |
|----|----------------------------------------------------------------------------------------------------------|-------------------------------------------------------|
| A1 | Rates in the master are per mille of sum insured.                                                        | Rating engine formulas change; re-test                |
| A2 | Pincode zone n maps to the occupancy sheet column 'Zone I' to 'Zone IV' respectively (1 = highest risk). | EQ rates would be wrong; verified on sample rows only |
| A3 | The system computes an indicative premium; insurer quotes override it.                                   | More scope for rate negotiation tools                 |
| A4 | Single organisation, English UI, India-only locations.                                                   | Add multi-tenant and localisation work                |
| A5 | Release 1 sends RFQs by email; no insurer integration.                                                   | Integration adds weeks per insurer                    |
| A6 | Team and timeline as per document 03.                                                                    | Re-plan                                               |

### 4. Risk register

| ID | Risk                                  | Likelihood | Impact | Mitigation                                 | Owner    |
|----|---------------------------------------|------------|--------|--------------------------------------------|----------|
| R1 | Formats or answers late               | Medium     | High   | Escalate at week 2; parallel platform work | PM       |
| R2 | Add-on formula misread                | Medium     | High   | Signed worked examples; golden tests       | BA       |
| R3 | Master data errors                    | Medium     | Medium | Import validation and client cleanup       | Dev lead |
| R4 | Layout matching effort underestimated | Medium     | Medium | Template-based export; agree tolerances    | Dev lead |

| ID | Risk                                 | Likelihood | Impact | Mitigation                            | Owner       |
|----|--------------------------------------|------------|--------|---------------------------------------|-------------|
| R5 | Scope growth (portals, policy admin) | Medium     | High   | Change control; phase in R2/R3        | PM          |
| R6 | Security or data incident            | Low        | High   | Hardening, pen test, access reviews   | DevOps      |
| R7 | Low user adoption                    | Low        | Medium | Training, early demos, champion users | Client / PM |
